

Rates for the Multimodal Imaging Core are shown below and are valid from May 1, 2022 through April 30, 2023.

Investigators are strongly encouraged to consult the Core on study design, budgets and all related imaging costs, and to address relevant text for grant applications and other funding opportunities.

The Core welcomes inquiries on project design and radiochemistry needs.

For questions please contact:
multimodalimagingcore@ucdavis.edu

Core Services – Multimodal Imaging Core

Note: Supplies are billed separately from hourly rates unless specifically stated.

Labor rate per hour

Technical Labor \$98
Professional Consultation \$163

Imaging Modality

	<u>Rate</u>
PET*/CT	\$375
Inflation CT	\$375
CT	\$275
Optical Imaging (<i>does not include luciferin</i>)	\$125
Ultrasound (<i>Supplies only</i>)	\$14.75
(Professional labor billed separately and supplies for ultrasound-guided procedures billed separately)	

Rate/slide

Whole Slide Scans \$49.74

Rate/hour

Microtome \$24.82

Radiochemistry:** Costs depend on project needs and labor involved (please contact the Core***); includes π PET, PET/CT, total-body PET and related activities that are billed separately

Pharmacokinetics: Costs depend on project needs and labor involved (***please contact the Core***)

Quantitative Image Analysis: Costs depend on project needs (***please contact the Core***)

Available radiotracers include:

^{18}F FDG (up to 2 mCi)

^{18}F and ^{11}C PET tracers

Cyclotron-produced ^{18}F (up to 3,000 mCi)

Cyclotron-produced ^{64}Cu (150-200 mCi)

^{89}Zr and other radioimmunoconjugates

Special tracers as arranged (please contact the Multimodal Imaging Core for radiotracer needs and costs)
